

IRIS Star Practice Management

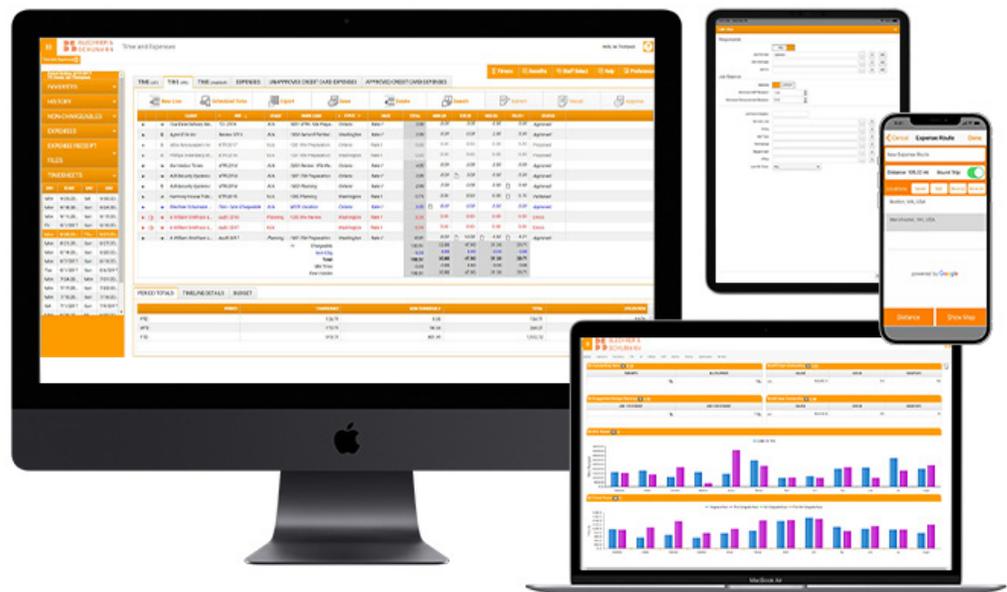

The most innovative, feature rich and technically advanced practice management software available

For medium and larger firms, IRIS Star Practice Management offers a flexible modular approach to practice management, allowing you and your firm to focus on what's most important. Our versatile structure allows for it to accommodate your needs and grow as your firm changes.

KEY BENEFITS

- > Flexible modular approach
- > Extensive customization
- > On-premise or Cloud
- > Comprehensive and powerful functionality for accounting firms
- > Integrate with your existing software
- > Implementation options

» *“Of all the software we considered, we are happiest with Star. Compared to other vendors, Star’s people knew the most about the accounting profession.”*

JOAN PAYNE | CFO
REHMANN

Trusted by over one third of the top 100 CPA firms

Accounting firms across the world use IRIS Star Practice Management software to help run their businesses. These include regional and national offices of the Big 4 global practices and many members of the main international associations.

What IRIS Star Practice Management can do for you

IRIS Star Practice Management has specialized in the development and supply of practice management solutions to medium and larger firms in the UK and Europe since 1973. In 2003, Star expanded its presence to the US market, now with over one third of the Top 100 CPA practices as clients.

As a proven international supplier, Star’s success comes from its considerable experience and understanding of what firms want, applying that knowledge and providing a personalized service for medium to large professional firms worldwide.

Star Practice Management

Key Features

Mobile

Mobile applications for time and expense entry are intended to keep the business process moving irrespective of where you are.

Time & billing

Provides extensive and easy-to-use functionality that will address any of your requirements.

Payments portal

All client payments are automatically made via the Apxium payment portal, allowing you to pay your bills more quickly and with less work for you and your clients.

Due dates & workflow

Monitor your progress towards task completion and identify work that is falling behind so you can take appropriate action before it's too late.

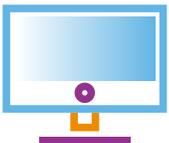

Budgeting & scheduling

Provides a range of comprehensive functionality designed to provide full control and visibility of resource allowing you to effectively manage your most valuable asset – people.

BI & reporting

Provides a range of business intelligence and reporting tools designed to ensure you have immediate access to key information and, where possible, the ability to automate reporting.

CRM

Designed to assist you in managing client and contact relationships, taking advantage of new revenue opportunities and running effective marketing initiatives.

Back office financials

Fully accredited to supply and support Microsoft Dynamics 365 Business Central to deliver close integration with our software for GL, AP and Fixed Assets.

APIs

Star has a library of APIs to provide secure connectivity for the movement of data in or out of a Star database.
